The Company

Das Unternehmen

The **RENOLIT** Group is an international leader in the manufacture of high-quality plastic films and related products for technical applications.

This independent family-owned business, which has been setting benchmarks for quality and innovation for over 65 years, now employs a workforce of approximately 4,500 employees at more than 30 production sites and sales entities.

The **RENOLIT** brand enjoys a worldwide reputation for technical expertise, modern product design and customer-oriented service.

RENOLIT offers a wide range of thermoplastic films and related services for many different industries. Included amongst them are construction, automotives, graphics, labels, furniture and medical technology. With many years of experience and a great innovative spirit, our Business Unit **RENOLIT** *DESIGN* has developed a superb range of films that can be formed both two and three dimensionally.

Furniture manufacturing, shop fitting or interior design demand almost unlimited design freedom. With their extraordinary diversity of colours, structures and features, these films will provide a surface which looks good, feels great and performs to the highest standards.

Die **RENOLIT Gruppe** *zählt zu den international führenden Herstellern hochwertiger Kunststoff-Folien und verwandter Produkte für technische Anwendungen.*

Das unabhängige Familienunternehmen setzt seit über 65 Jahren Maßstäbe in Qualität und Innovation und beschäftigt heute rund 4.500 Mitarbeiter an mehr als 30 Produktionsstandorten und Vertriebsgesellschaften.

Der Name **RENOLIT** *steht weltweit für technische Kompetenz, modernes Produktdesign und partnerschaftlichen Service.*

RENOLIT *bietet ein breites Spektrum an Kunststoff-Folien und damit verbundene Dienstleistungen für unterschiedlichste Branchen, wie die Bau- und Automobilindustrie, die Grafik- und Etikettenindustrie, die Medizintechnik und die Möbelindustrie. Mit langjähriger Erfahrung und großer Innovationsfreude entwickelt unser Geschäftsbereich* **RENOLIT** *DESIGN, ein einzigartiges Angebot zwei- und dreidimensional verformbarer Folien.*

Ob im Möbeldesign zur Herstellung von Möbelfronten für Küchen, Schlaf- und Badezimmer, im Ladenbau oder in der Innenraumgestaltung – diese Folien verleihen ihrem Trägermaterial eine ästhetisch hochwertige Oberfläche und passen sich seiner Form perfekt an. Den hohen Anforderungen an Flexibilität und Beständigkeit werden sie in vorbildlicher Weise gerecht, und ihre außerordentliche Vielfalt an Farben, Strukturen und Eigenschaften ermöglicht eine nahezu uneingeschränkte gestalterische Freiheit.

3D Stock Range

3D Lagerkollektion

Tastes differ just like people themselves. With our 3D Stock Range there are products to meet every desire. The **RENOLIT** 3D Stock Range provides the furniture component market with the widest and most sophisticated product offer available. The range contains a superb collection of woodgrains, abstract prints and solid colours available for immediate despatch. We are constantly developing original solutions to meet the needs of an ever changing and demanding market by offering new trends and ideas.

The **RENOLIT** 3D Stock Range is presented as two individual brands, each with distinctive and appealing product characteristics.

RENOLIT COVAREN contains the company's premier 3D films. This stock collection is setting trends with sophisticated surface structures. Incredibly realistic woodgrain prints are almost indistinguishable from real wood. The range of solid colours contains metallic effects as well as matt finishes. Superb high gloss films are available in a variety of colours and brilliant decors.

RENOLIT ALKOREN presents a classic collection of woodgrains and solid colours. All the major woodgrain species are available in a range of different shades and tones. Choose between oak, beech, maple and cherry, as well as exotic timbers and fashionable fruitwoods. A wide range of solid colours covers the whole palette – from light to dark and vibrant to subtle.

Die Geschmäcker sind so verschieden wie die Menschen selbst. Unser 3D-Lagerprogramm lässt deshalb keine Wünsche offen. Die **RENOLIT** *3D Stock Range bietet dem Markt für Möbelbauteile das umfangreichste und vielfältigste Produktsortiment, das derzeit auf dem Markt erhältlich ist. Unsere Holzreproduktionen, die abstrakten Fantasiedekore sowie ein breites Spektrum an trendigen Unifarben sind alle sofort lieferbar. Unsere Designlösungen entwickeln wir kontinuierlich weiter, um dem anspruchsvollen und sich ständig wandelnden Markt immer neue Trends anbieten zu können.*

Die **RENOLIT** *3D Stock Range basiert auf zwei Produktmarken mit attraktiven und jeweils unverwechselbaren Produkteigenschaften.*

RENOLIT COVAREN *ist die Premium-Kollektion des Lagerprogramms, die mit anspruchsvollen Oberflächenstrukturen neue Trends setzt. Ihre außergewöhnlich naturgetreuen Holzdekore sind von echtem Holz kaum zu unterscheiden. Iriodin-Effekte verleihen den Hölzern zusätzliche Wertigkeit. Für die Unifarben gibt es neben verschiedenen Metallic-Effekten auch trendige Mattoberflächen. Unsere Hochglanzfolien bieten eine große Vielfalt an Farbe und brillanten Dekoren.*

RENOLIT ALKOREN *steht für die klassische Auswahl an Holzdekoren und Unifarben. Die Kollektion enthält die bedeutendsten Holzarten in unterschiedlichen Schattierungen und Farbnuancen. Wählen Sie zwischen Ahorn, Eiche, Buche und Walnuss, zwischen exotischen Hölzern und modischen Obsthölzern. Eine breite Palette an Unifarben deckt das gesamte Spektrum ab – von hell bis dunkel, von lebhaft bis gedeckt.*

Matching 3D and 2D Products

RENOLIT 3D Stock Range also perfectly matches or coordinates with the materials presented in **RENOLIT** 2D Applications. Within the furniture components market these products are primarily used for profiles and door production. Please do not hesitate to contact us for further information.

Complimentary Materials

Many colours and decors in our range coordinate with the worlds leading decorative panel, laminate and paper producers. The current colour and decor reference lists are available on request. Designers have the flexibility to combine these materials to produce beautiful furniture and create stunning interior projects.

Abgestimmte 3D und 2D Produkte

Die **RENOLIT** *3D Stock Range ist perfekt auf unsere 2D Produkte abgestimmt., die im Bereich der Möbelteile hauptsächlich zur Herstellung von Profilen und Türen eingesetzt werden. Weitere Details erhalten Sie jederzeit auf Anfrage.*

Dekorverbund

Zahlreiche Farben und Dekore unserer neuen Lagerkollektion haben wir mit den führenden Herstellern von Trägerwerkstoffen und Oberflächenmaterialien sowie mit Dekordruckern abgestimmt, um einen optimalen Dekorverbund zu gewährleisten. Eine aktuelle Dekorverbundsliste stellen wir Ihnen bei Bedarf gerne zur Verfügung. Designer können dadurch problemlos Materialien auf Front und Korpus kombinieren und so geschmackvolle Möbel sowie außergewöhnliche Innenausstattungen entwerfen.

Technical Information

Continuous investment in new technology and manufacturing has led to the production of materials with superb performance characteristics. Materials are manufactured to the highest quality and comply with all the necessary international standards and market requirements.

RENOLIT is also a founding member of the Initiative Group for 3D Door Manufacturing. This collection of like minded, high quality material and machinery manufacturers aim to improve the processing conditions used in the production of 3D components and provide long lasting and secure products for furniture manufacturers and consumers. A quality guide to manufacturing such components is available on request.

Technische Informationen

Wir investieren kontinuierlich in neue Werkstoff und Produktionstechnologien, um ein konstant hohes Fertigungsniveau und stets die bestmöglichen Materialeigenschaften zu gewährleisten. Unsere Materialien werden nach den höchsten Qualitätsstandards hergestellt und erfüllen alle erforderlichen internationalen Normen und Marktanforderungen.

RENOLIT *ist darüber hinaus Gründungsmitglied des Initiativkreises 3D Frontenfertigung. Diese Vereinigung von Herstellern hochwertiger Materialien und Maschinen hat sich zum Ziel gesetzt, die Verarbeitungsbedingungen bei der Herstellung von 3D-Fronten zu verbessern, um den Möbelherstellern und Endverbrauchern ein langlebiges und sicheres Produkt zur Verfügung zu stellen. Ein Pflichtenheft zur Herstellung dieser Komponenten senden wir Ihnen auf Anfrage gerne zu.*

PRODUCT SPECIFICATION | *PRODUKTSPEZIFIKATION*

Gauge/Thickness | *Foliendicke*	0.35 mm (350 microns or 14 mil) **RENOLIT** COVAREN^{PET} 0.25–0.35 mm (250-350 microns or 10-13 mil) **RENOLIT** COVAREN^{HG} 0.50 mm (500 microns or 20 mil) **RENOLIT** ALKOREN^{HG} 0.40 mm (400 microns or 16 mil)
Physical width | *Physikalische Breite*	1440 mm (57 inches) minimum

MATERIAL PROPERTIES

- excellent mechanical resistance
- light fast - colours are very stable over time
- highly stain resistant
- outstanding dimensional stability
- resistant to temperatures commonly found in a kitchen environment
- scratch resistant lacquer protects the material in use and helps withstand wear and tear
- primer coated on the reverse to promote a durable and lasting bond - compatible with the worlds leading adhesive systems

MATERIALEIGENSCHAFTEN

- *Mechanische Beständigkeit*
- *Lichtechtheit*
- *Fleckbeständigkeit*
- *herausragende Formbeständigkeit*
- *resistent gegen Temperaturen, wie sie in der Küchenumgebung üblicherweise vorkommen*
- *Die Oberfläche der* **RENOLIT** *3D-Folien ist mit einem kratzfesten Lack beschichtet, der das Folienmaterial schützt und Abnutzung vorbeugt*
- *Die Rückseite der Folie ist mit einem speziellen Haftvermittler beschichtet, der eine strapazierfähige und dauerhafte Verbindung mit dem Trägerwerkstoff gewährleistet. Mit diesem speziell entwickelten Haftvermittler bieten wir eine kompatible Lösung für die weltweit führenden Haftsysteme.*

Thermoforming

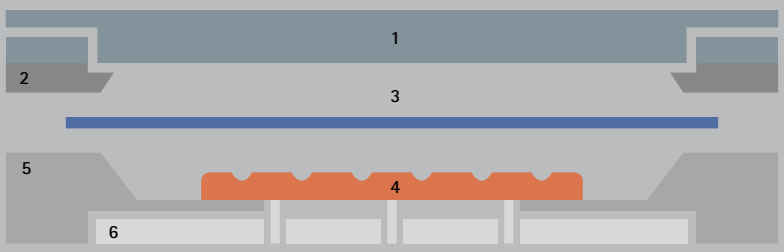
RENOLIT 3D films are supplied as decorative surfaces for lamination to machined fibreboard (MDF) using a thermoforming press. To guarantee the ideal processing conditions for our materials we are happy to give advice and support with information on processing, storage and cleaning.

Thermoformen

Zur dekorativen Beschichtung von MDF-Trägerplatten werden **RENOLIT** *3D Folien mit Hilfe von Membran- oder Vakuumpressen verarbeitet. Um optimale Verarbeitungsbedingungen für unsere Materialien zu gewährleisten, unterstützen wir Sie gerne mit umfangreichen Informationen zu den Themen Verarbeitung, Lagerung und Reinigung.*

EXAMPLE OF 3D PROCESSING USING A MEMBRANE THERMOFORMING PRESS

DIE 3D VERARBEITUNG AM BEISPIEL EINER MEMBRANLOSEN THERMOFORMANLAGE

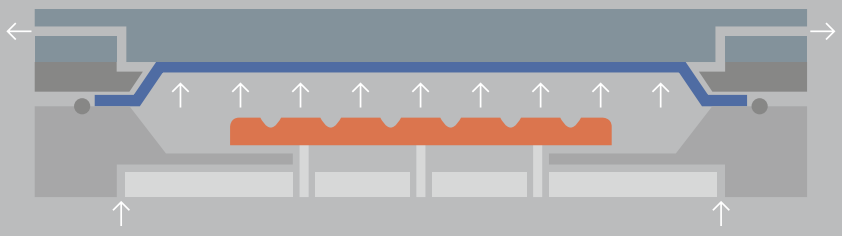


1 Heating plate
2 Upper seal frame
3 3D film
4 Board to be laminated
5 Lay-up pallet (tray)
6 Backing panel / Pin system

1 Heizplatte
2 Oberer Dichtrahmen
3 3D Folie
4 Werkstück
5 Legeplatte
6 Unterstück / Pin System

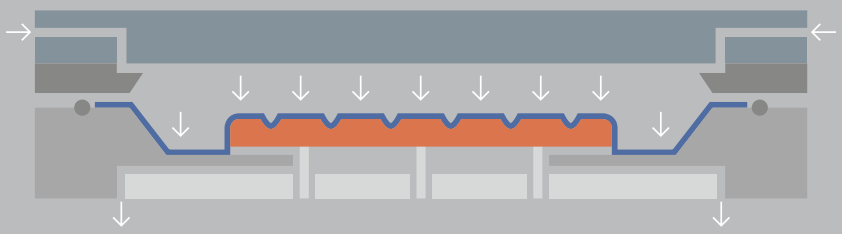
The work piece, ideally of a wood material like MDF, is placed in the thermoforming device. The thermoplastic 3D film is stretched on top of it.

Das Werkstück, idealerweise aus einem Holzwerkstoff wie MDF, wird in der Thermoformanlage platziert. Darüber wird die thermoplastische 3D Folie eingespannt.



The film held in the clamping frame is lifted up to the heating plate by vacuum and support pressure and heated evenly until it can be 3D formed.

Die im Spannrahmen gehaltene Folie wird mittels Vakuum und Stützdruck an die Heizplatte angelegt und gleichmäßig erwärmt, bis sie verformbar ist.



A vacuum pulls the warm film against the work piece from below. The best forming and adhesion to the work piece is achieved by using additional compressed air from above.

Ein Vakuum saugt die warme Folie von unten an das Werkstück. Zum optimalen Abbilden der Oberflächen und Konturen des Werkstücks sowie zum Erreichen der bestmöglichen Verklebequalität wird die Folie zusätzlich mit Druckluft von oben an das Werkstück gepresst.
